PERSONAL PROJECTS

tripInsel *04/2026 – Present*

Software Engineer (Freelance)

- Architected a B2B2C tourism marketplace with role-based dashboards, with a **Flutter** frontend and a backend built with **Java 17** and **Spring Boot 3**.
- Built AI-driven negotiation microservice using **FastAPI** and **OpenAI API**.
- Integrated **Stripe** for automated commissions, deposits, and provider wallet tracking.
- Deployed on **Azure** with **Docker** and automated **CI/CD** via **GitHub Actions**.

WORK EXPERIENCE

D-Talk *11/2024 – 04/2026*

Software Engineer (Part-Time) Remote

- Built **CI/CD** pipelines with **Jenkins**; monitored performance with **Prometheus** and **Grafana**.
- Containerized services with **Docker** and managed deployments on **Azure**.

D-Talk *05/2024 – 10/2024*

Internship Remote

- Designed and deployed **REST APIs** for user, design, and transaction management using **Spring Boot** and **MySQL**.
- Integrated Konnect banking API for online payments and commission handling.

INTERNSHIPS

ESPRIT *06/2023 – 07/2023*

Intern – Mobile Recruitment Application Tunisia

- Developed a cross-platform recruitment app with AI-powered quiz generation via **OpenAI API**.
- Built recruiter dashboard for managing candidates and interview workflows using **Flutter** and **Flask**.

ESPRIT *06/2022 – 07/2022*

Intern – Mobile E-Commerce Application Tunisia

- Developed native iOS and Android e-commerce apps using **SwiftUI** and **Kotlin**, with order management and payment integration.
- Designed UI/UX in **Figma**; built backend with **Node.js** and **MongoDB**.
